

Atharv Pawar

Junior Full Stack Developer | React, Next.js, Node.js, TypeScript | Cloud-Aware Developer

Mumbai, India | +91-9119468987 | atharvpawar34s@email.com | linkedin.com/in/atharvapawar34s | github.com/atharvapawar

PROFESSIONAL SUMMARY

Junior Full Stack Developer with hands-on internship experience across frontend development, backend-supported features, REST API integration, responsive UI, debugging, and deployment-oriented workflows. Skilled in React.js, Next.js, Node.js, Express.js, TypeScript, JavaScript, Python, MongoDB, MySQL, PostgreSQL, AWS basics, Docker, Git, and GitHub. Currently also training with Amazeheads in robotics/coding delivery, strengthening communication, technical explanation, classroom debugging, and STEM project guidance. Seeking junior full stack, frontend, React/Next.js, and web developer roles with a long-term path toward backend, cloud, DevSecOps, and AI security engineering.

CORE SKILLS & TECHNOLOGIES

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, responsive UI, reusable components

Backend: Node.js, Express.js, REST APIs, CRUD workflows, authentication basics, API integration, error handling

Databases: MongoDB, MySQL, PostgreSQL, Mongoose/Prisma basics

Cloud & Tools: AWS basics, Docker, Git, GitHub, Postman, VS Code, deployment support

Strengths: Debugging, clean code, structured learning, communication, requirement translation, fast execution

PROFESSIONAL EXPERIENCE

STEM & Robotics Instructor Trainee | Amazeheads May 2026 - Present

- Training to deliver school robotics and coding sessions, with expected Vani Vidyalay, Mulund assignment for hands-on STEM learning.
- Studying robotics curriculum covering kit introduction, model building, coding flow, electronics basics, AI/ML modules, MIT App Inventor, testing, and project presentation.
- Strengthening technical communication, learner debugging, and structured instruction skills that transfer directly to developer collaboration and documentation.

Coding Teacher Intern | Empower Nov 2025 - Apr 2026

- Delivered hands-on coding sessions on web development and programming fundamentals, helping learners improve problem-solving, JavaScript logic, and mini-project execution.
- Created lesson material, debugged student code, and provided one-on-one guidance to improve code quality, confidence, and classroom engagement.
- Translated technical concepts into simple, actionable steps, building strong communication and debugging discipline relevant to developer teams.

Web Development Intern | KartBuddy Logistics May 2025 - Aug 2025

- Developed responsive web modules for logistics-related workflows, converting business requirements into usable interfaces and backend-supported features.
- Worked with Node.js, Express.js, databases, and CRUD workflows to support data handling, internal tooling, and day-to-day product improvements.
- Supported debugging, testing, and deployment-related tasks while following structured development processes and confidentiality requirements.

Web Developer Intern | EasyGoLife Oct 2024 - Dec 2024

- Built reusable UI components and responsive pages, improving consistency, usability, and cross-device behavior across web application screens.
- Assisted with API integration, feature support, bug fixing, and release-readiness tasks to help deliver stable web application updates.

SELECTED PROJECTS

Featured Dashboard Application | Next.js, TypeScript, Tailwind CSS

- Designed a modern dashboard interface with modular components, responsive layouts, clean routing structure, and scalable frontend architecture.
- Implemented data-driven views, reusable UI patterns, and organized TypeScript code to improve maintainability and future extensibility.

Portfolio Website | MERN Stack

- Built a full-stack portfolio website to showcase projects, skills, and contact details through a responsive recruiter-friendly interface.
- Integrated frontend, backend, and data flow concepts to demonstrate practical end-to-end web development fundamentals.

Dockerized Node.js Application | Node.js, Docker

- Containerized a Node.js application to standardize local development and simplify execution across environments.
- Packaged dependencies and runtime behavior using Docker to create a cleaner deployment-ready workflow.

Robotics/STEM School System - Planned Portfolio Build | Next.js, Node.js, MongoDB/PostgreSQL

- Planned school-tech system connecting robotics session planning, student progress tracking, project status, and teacher notes into one practical dashboard.

CANDIDATE VALUE HIGHLIGHTS

- Hybrid profile: web development execution plus coding/robotics instruction, useful for teams that value clear communication and fast learning.
- Hands-on exposure to responsive UI, API integration, debugging, testing support, deployment workflows, and learner project guidance.
- Strong fit for Junior Full Stack Developer, Frontend Developer, React/Next.js Developer, Web Developer, and coding-instructor-adjacent roles.
- Career direction: software engineering first, then backend, cloud, DevSecOps, and AI security specialization over the long term.

CERTIFICATIONS & EDUCATION

Master in Full Stack Web Development with AWS | AWS Certified Cloud Practitioner | SQL Professional Certification | Python Programming Essentials

Bachelor of Computer Applications (BCA) | Pune Tilak Vidyapeeth, Maharashtra | 2022

HSC | S.D. Gadre High School, Maharashtra | 2019
