

Atharv Pawar

STEM & Robotics Instructor | Coding Educator | Full Stack Developer Trainee

Mumbai, India | +91-9119468987 | atharvpawar34s@email.com | linkedin.com/in/atharvapawar34s | github.com/atharvapawar

PROFESSIONAL SUMMARY

STEM/Robotics Instructor Trainee and Junior Full Stack Developer with experience in coding instruction, classroom-based debugging, web development, robotics curriculum preparation, learner guidance, and project-based technical education. Currently training with Amazeheads for school robotics and coding delivery aligned with programs such as Vani Vidyalay, Mulund. Skilled in simplifying technical concepts across robotics kits, electronics basics, MIT App Inventor, AI/ML introductions, JavaScript fundamentals, web development, and project presentation. Strong fit for robotics instructor, coding educator, STEM trainer, EdTech, and school technology roles requiring technical clarity, student engagement, safety discipline, and structured lesson execution.

CORE SKILLS & TEACHING TECHNOLOGIES

STEM & Robotics: Robotics curriculum delivery, kit-based learning, model building, electronics/circuits, lab discipline, project testing

Coding Education: JavaScript basics, web development fundamentals, MIT App Inventor, AI/ML introductions, debugging guidance

Web Development: React.js, Next.js, Node.js, Express.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Tools: Git, GitHub, Postman, VS Code, Docker basics, AWS basics

Strengths: Lesson planning, student communication, beginner-friendly explanation, project guidance, presentation support

PROFESSIONAL EXPERIENCE

STEM & Robotics Instructor Trainee | Amazeheads May 2026 - Present

- Training to deliver school robotics and coding sessions, with expected Vani Vidyalay, Mulund assignment for hands-on STEM learning from the upcoming academic month.
- Studying grade-wise robotics curriculum covering lab rules, kit introduction, model building, coding flow, testing, presentation, and project-based assessment.
- Preparing to guide students through robotics projects, AI/ML introductions, MIT App Inventor activities, electronics/circuit concepts, debugging support, and safe classroom discipline.
- Building classroom delivery confidence through structured lesson flow, student interaction practice, concept explanation, and hands-on project preparation.

Coding Teacher Intern | Empower Nov 2025 - Apr 2026

- Delivered hands-on coding sessions on programming fundamentals and web development, helping learners strengthen logic building, problem-solving, and JavaScript basics.
- Created lesson materials, debugged student projects, and provided one-on-one guidance that improved learner confidence, code quality, and project completion.
- Converted complex technical ideas into simple classroom steps, supporting student engagement and practical understanding.

Web Development Intern | KartBuddy Logistics May 2025 - Aug 2025

- Developed responsive web modules and backend-supported features, strengthening practical understanding of software workflows that can be translated into classroom examples.
- Worked with Node.js, Express.js, databases, CRUD workflows, debugging, testing support, and deployment-related tasks.

Web Developer Intern | EasyGoLife Oct 2024 - Dec 2024

- Built reusable UI components and responsive pages, improving web interface consistency and cross-device usability.
- Assisted with API integration, bug fixing, and feature support for stable web application updates.

TEACHING & PROJECT PORTFOLIO

Robotics/STEM School Management Mini-System | Planned Portfolio Build - Next.js, Node.js, Database

- Designing a practical school-tech dashboard for session planning, student progress, attendance, robotics projects, and teacher notes.
- Connects current robotics trainer role with software development proof for EdTech and school-technology opportunities.

Featured Dashboard Application | Next.js, TypeScript, Tailwind CSS

- Built a modern dashboard interface with modular components, responsive layouts, and data-driven UI patterns useful for admin and analytics-style education tools.

Portfolio Website | MERN Stack

- Created a web portfolio to present technical projects, skills, and contact details through a recruiter-friendly responsive interface.

CANDIDATE VALUE HIGHLIGHTS

- Strong bridge profile: coding educator plus web developer fundamentals, useful for robotics, STEM, EdTech, and school coding programs.
- Comfortable explaining technical concepts to beginners while maintaining debugging discipline and structured lesson flow.
- Able to support hands-on activities involving robotics kits, coding logic, AI/ML introductions, MIT App Inventor, electronics basics, and learner projects.
- Long-term technical growth path: full-stack development, cloud, DevSecOps, and AI security, adding future depth to STEM/EdTech delivery.

CERTIFICATIONS & EDUCATION

Master in Full Stack Web Development with AWS | AWS Certified Cloud Practitioner | SQL Professional Certification | Python Programming Essentials

Bachelor of Computer Applications (BCA) | Pune Tilak Vidyapeeth, Maharashtra | 2022

HSC | S.D. Gadre High School, Maharashtra | 2019
